

I hve Dell Inspiron N7010, Keys Stopped Working

Posted by delladmin - 29 Dec 2016 05:28

Try this

Get a pad of Post-it notes. Take one and slide it face down under each corner of the keys in question. Then do it face up. Replace the Post-it note when it starts getting crumpled. Bring up Wordpad or some word processor and test the keys. Repeat the procedure several times if needed. This has always worked for me.

,

Good luck.
