

Inspiron N5110 integrated webcam not working

Posted by admin - 26 Jun 2012 08:05

I bought Inspiron N5110 last week. Right from the first day, I could not use the integrated webcam with Dell Webcam central or with skype software. when I open Dell webcam central, it displays this message at the bottom "No supported Webcam connected". Even in Skype, when I click on the Video, nothing shows up. I uninstalled and reinstalled dell webcam central, but no use. I also uninstalled the webcam driver from Device Manager -> Imaging devices and then reinstalled. But it's still the same. I also could not see any driver for webcam from my computer model in Dell website. driver support Any one has the same problem?
