

dell inspiron n5110 problem with webcam

Posted by admin - 26 Jun 2012 08:13

Hello to all the helping hearts!!!

I bought a Inspiron 15R N5110 laptop a week ago. I have downloaded its all drivers and installed them. Some are working and some are not. My webcam is not working at all. When I try for a video call in skype it gives me message that skype doesn't support my webcam and suggest me to upgrade. I searched in dell.com for driver but all I found is Dell Webcam Central which doesn't work. Now I am in trouble. What am I supposed to do now???

Please help me to find out the webcam driver for inspiron n5110.
