Thank you for stopping by and hope you have an enjoyable shopping experience!

How To take care your Dell Inspiron 15R battery?

When using a laptop as a desktop replacement the Dell 15R battery should not be left in for long periods of time. The laptop will over time discharge the Dell Inspiron 15R battery. Remove the laptop keyboard, making sure that it is charged to 50% and store it in a dry, warm place. Ensure that it is wrapped protectively and nothing will be dropped on it.

The DELL battery Inspiron 15R should be re-installed every 3-4 weeks and allowed to fully discharge. Leaving a battery in storage for longer than this without using could cause the electronics to fully discharge as the circuitry of the battery itself consumes power.

Leaving a battery in a while using an electrical outlet for long periods of time will keep the battery in a constant state of charging up and that will reduce the life cycle of the Dell 15R battery replacement .
